

Challenge #1

Nama Challenge: Strings It

Kategori: General Skills

Deskripsi: Can you find the flag in [file](#) without running it?

Pertama saya melihat bahwa challenge nya meminta “apakah bisa menemukan flagnya tanpa menjalankan filenya”

```
Command Prompt
s2638
s2262
s2225
s9495
s9452
s9065
s9022
s6124
s2424
s9631
s9201
s1461
s1428
s1031
s7096
s3596
s3183
s3146
s9713
s9303
s5063
s5028
s1563
s1528
s1113
s5709
s5359
s1859
s892
s855
```

Tapi saat dicoba membukanya dengan syntax “strings” kemudian nama file yang diberikan yaitu “strings” juga, saya diberikan jutaan tulisan lumayan mustahil buat nyari flag nya jika dibaca satu satu

www.geeksforgeeks.org/linux-unix/grep-command-in-unixlinux/

Linux-Unix Interview Questions Shell Scripting Kali Ubuntu Red Hat CentOS Docker Kubernetes Python R Java Sign In

```
libraries like Django, Flask, Pandas, Tensorflow, Scikit-learn and many more.  
Python is an object oriented programming language which encapsulates code within  
object.  
Python is cross-platform which works on Windows, Mac and Linux without major cha  
nges.  
Python is used by big companies like Google, Netflix and NASA.
```

Syntax of grep Command in Unix/Linux

The basic syntax of the 'grep' command is as follows:

```
grep [options] pattern [files]
```

- [options]: These are command-line flags that modify the behavior of grep.
- [pattern]: This is the regular expression you want to search for.
- [file]: This is the name of the file(s) you want to search within. You can specify multiple files for simultaneous searching.

Commonly Used `grep` Options

1. Case insensitive search

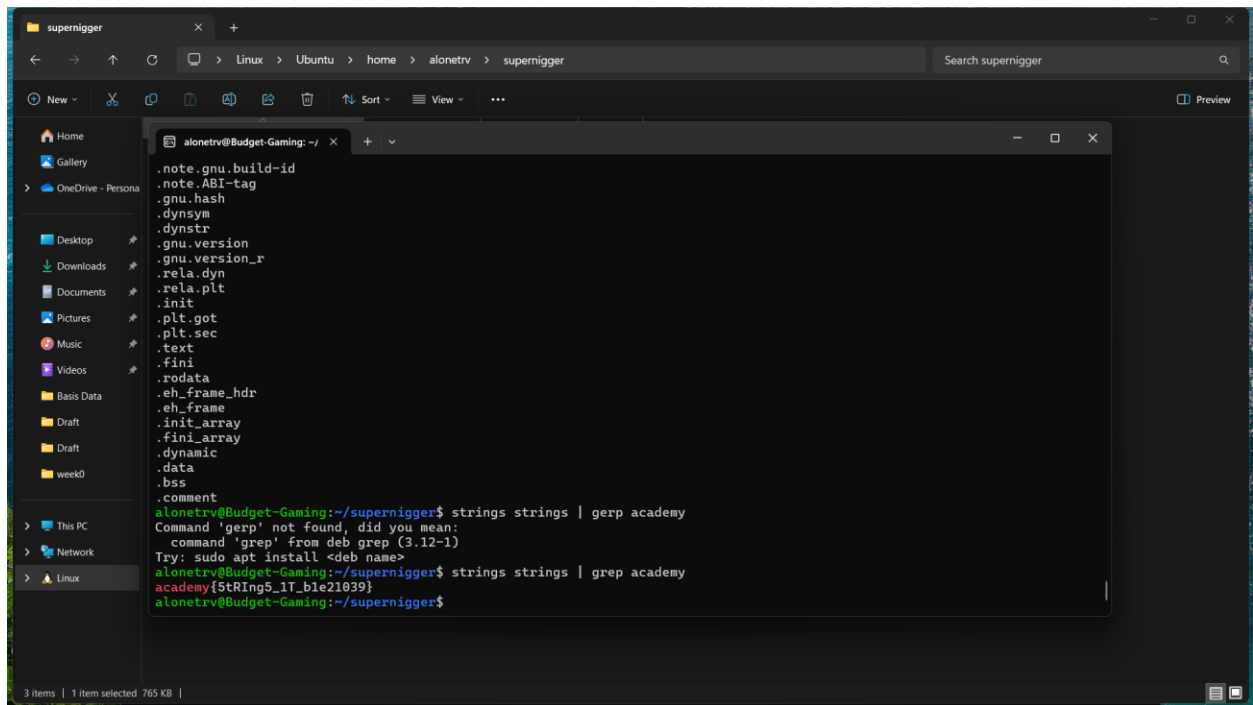

The `-i` option enables to search for a string case insensitively in the given file. It matches the words like "UNIX", "Unix", "unix".

```
grep -i "UNIX" geekfile.txt
```

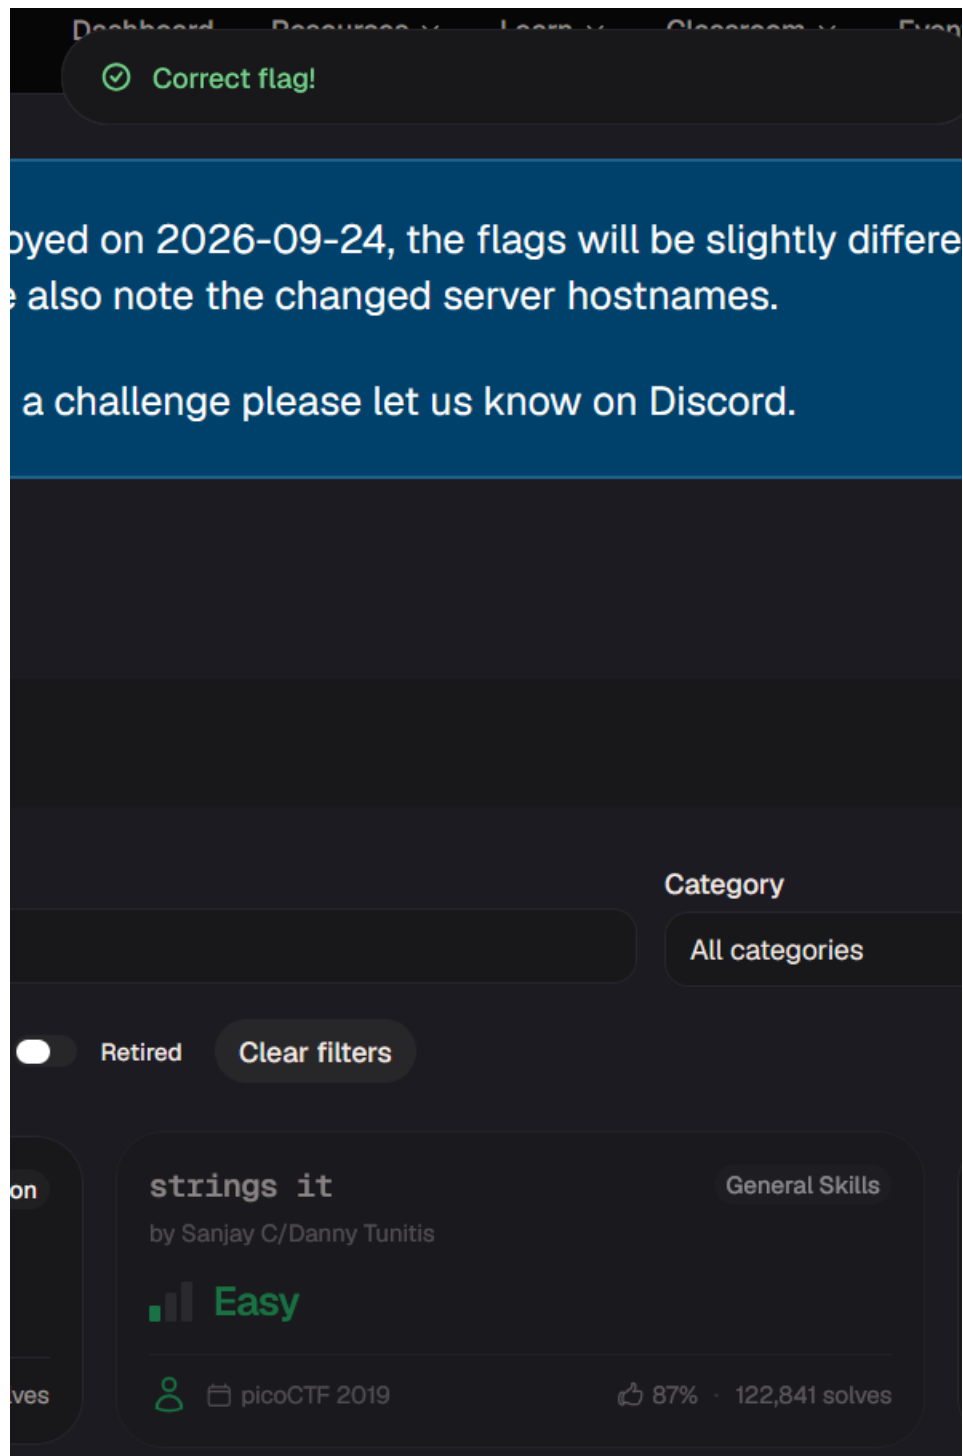

Output:

```
administrator@GFG19566-LAPTOP:~$ grep -i "UNIX" geekfile.txt  
unix is great os. unix was developed in Bell labs.  
Data linux which one you choose.
```

Dan saya menemukan ternyata bisa pake “grep” wsl buat nyari nya terus saya coba pakai command nya

dan berhasil ketemu flagnya

Challenge #1 Done

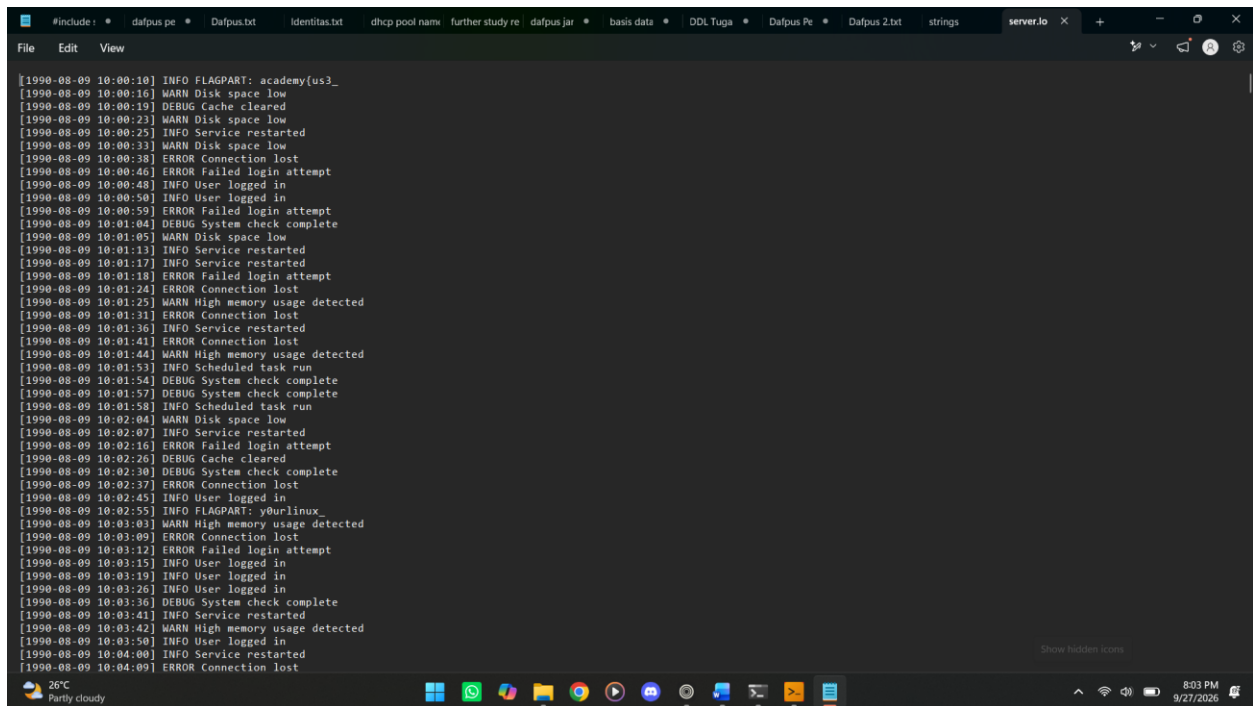

Challenge #2

Nama Challenge: Log Hunt

Kategori: General Skills

Deskripsi Challenge: Our server seems to be leaking pieces of a secret flag in its logs. The parts are scattered and sometimes repeated. Can you reconstruct the original flag? Download the [logs](#) and figure out the full flag from the fragments.

Selanjutnya challenge menyuruh saya untuk menggabungkan kan flag flag yang berantakan jadi flag yang satu, saat saya buka file log tersebut isi nya banyak kali

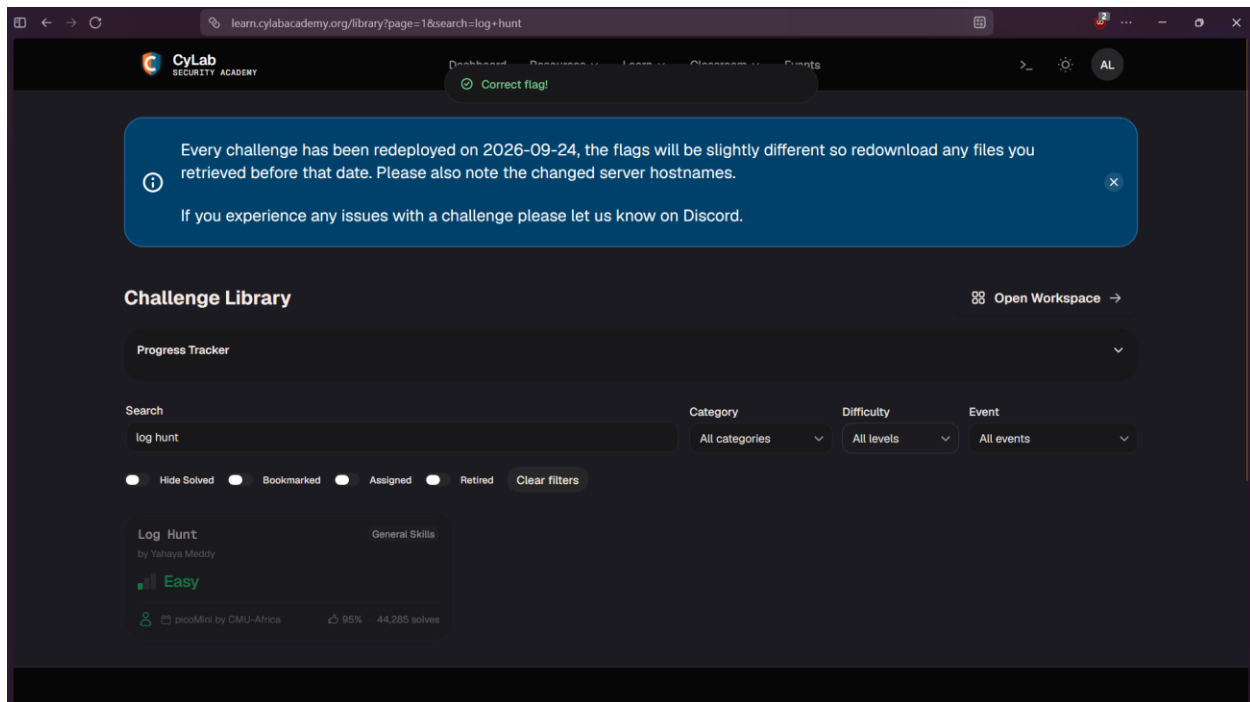

```

```

Dan berhasil, sekarang hanya perlu di rakit ulang saja

Dan challenge #2 Selesai

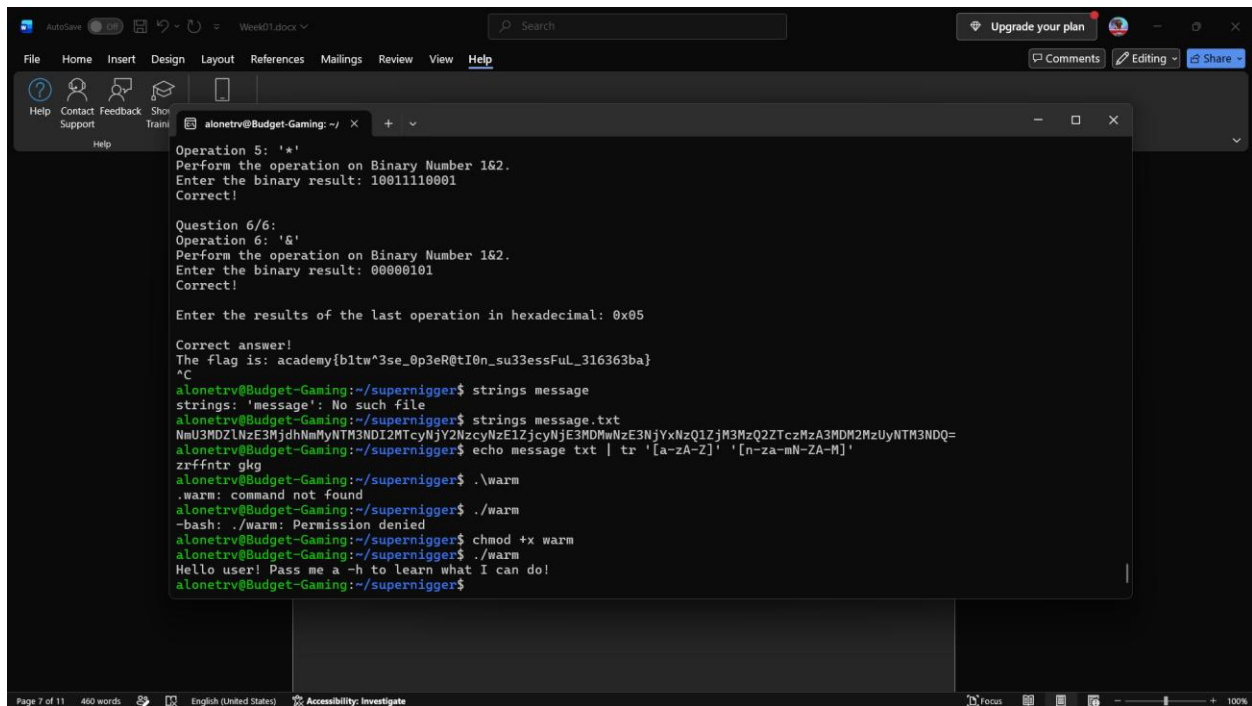

Challenge #3

Nama Challenge: Wave a Flag

Kategori: General Skills

Deskripsi: Can you invoke help flags for a tool or binary? This program has extraordinarily helpful information... [warm](#)

Untuk ini saya coba download file nya dan menjalankan file tersebut tapi mendapatkan “permission denied” saya pun lumayan bingung untuk apa yang harus dilakukan selanjutnya dan terpaksa membuka hint, pada salah satu hint disuruh untuk membuat executablenya dulu dengan memakai `chmod +x warm`, setelah saya menjalankan command itu baru saja menjalankan program tersebut

```
alonertrv@Budget-Gaming: ~/j x + v
Operation 5: '*'
Perform the operation on Binary Number 1&2.
Enter the binary result: 10011110001
Correct!

Question 6/6:
Operation 6: '5'
Perform the operation on Binary Number 1&2.
Enter the binary result: 00000101
Correct!

Enter the results of the last operation in hexadecimal: 0x05
Correct answer!
The flag is: academy{bltw*3se_0p3eR@tI0n_su33essFuL_316363ba}
^C
alonertrv@Budget-Gaming:~/supernigger$ strings message
strings: 'message': No such file
alonertrv@Budget-Gaming:~/supernigger$ strings message.txt
NmU3MDZLNzE3MjdNnMyNTM3NDI2MTcyNjY2NzcyNzE1ZjcyNjE3MDMmNzE3NjYxNzQ1ZjM3MzQ2ZTczMzA3MDM2MzUyNTM3NDQ=
alonertrv@Budget-Gaming:~/supernigger$ echo message.txt | tr '[a-zA-Z]' '[n-za-mN-ZA-M]'
zrffntr gkg
alonertrv@Budget-Gaming:~/supernigger$ ./warm
./warm: command not found
alonertrv@Budget-Gaming:~/supernigger$ ./warm
-bash: ./warm: Permission denied
alonertrv@Budget-Gaming:~/supernigger$ chmod +x warm
alonertrv@Budget-Gaming:~/supernigger$ ./warm
Hello user! Pass me a -h to learn what I can do!
alonertrv@Budget-Gaming:~/supernigger$
```

Dan program berhasil jalan, dan program nya meminta aku untuk memberikannya “-h” saya pun memberikannya dan gagal saya pun mencoba “./warm -h”

```
alonetrv@Budget-Gaming: ~/$ cd supernigger
alonetrv@Budget-Gaming: ~/supernigger$ ./warm
Hello user! Pass me a -h to learn what I can do!
alonetrv@Budget-Gaming: ~/supernigger$ -h
-h: command not found
alonetrv@Budget-Gaming: ~/supernigger$ ./warm -h
Oh, help? I actually don't do much, but I do have this flag here: academy{b1scults_4nd_gr4vy_57d8c79}
alonetrv@Budget-Gaming: ~/supernigger$
```

Dan Challenge #3 Berhasil

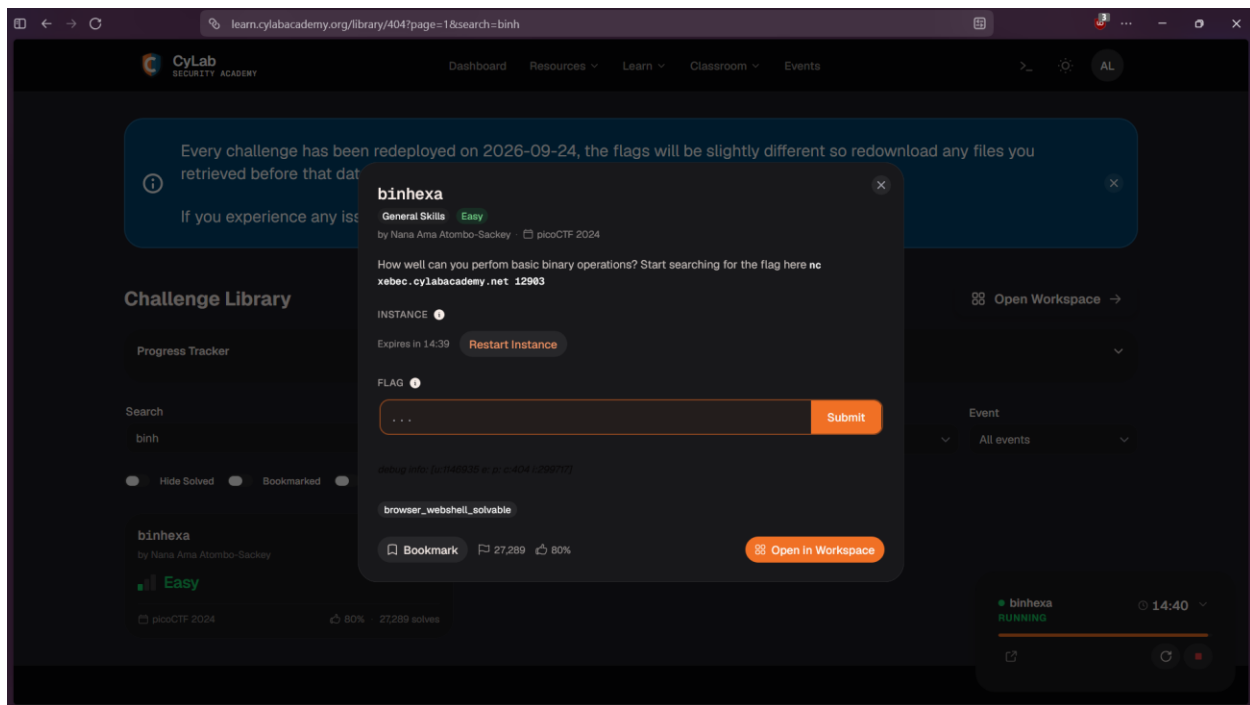

Challenge #4

Nama Challenge: Binhexa

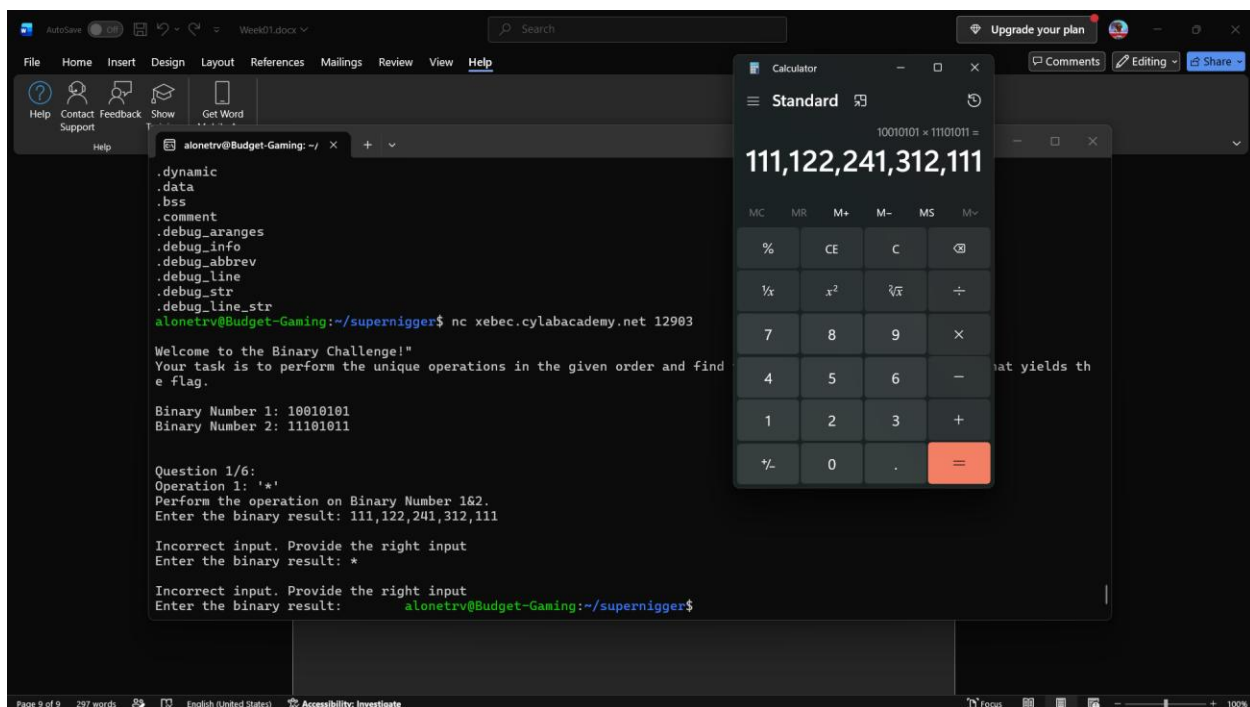

Kategori: General Skills

Deskripsi: How well can you perform basic binary operations?

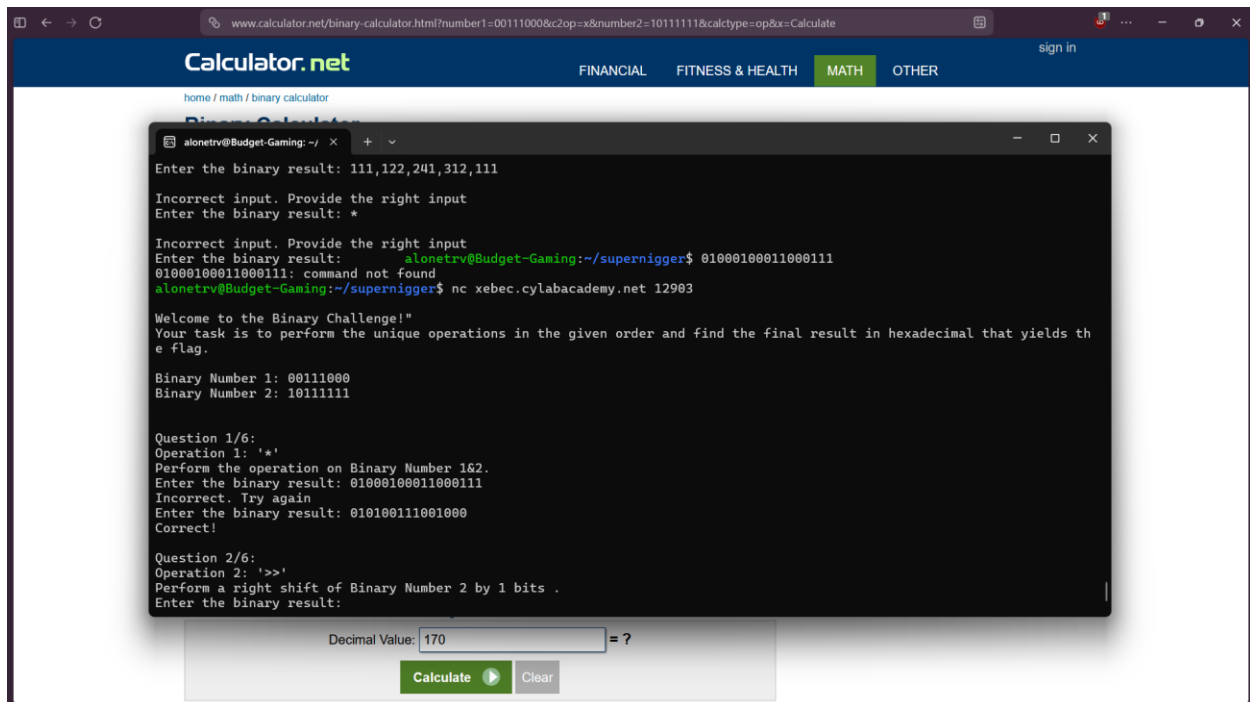

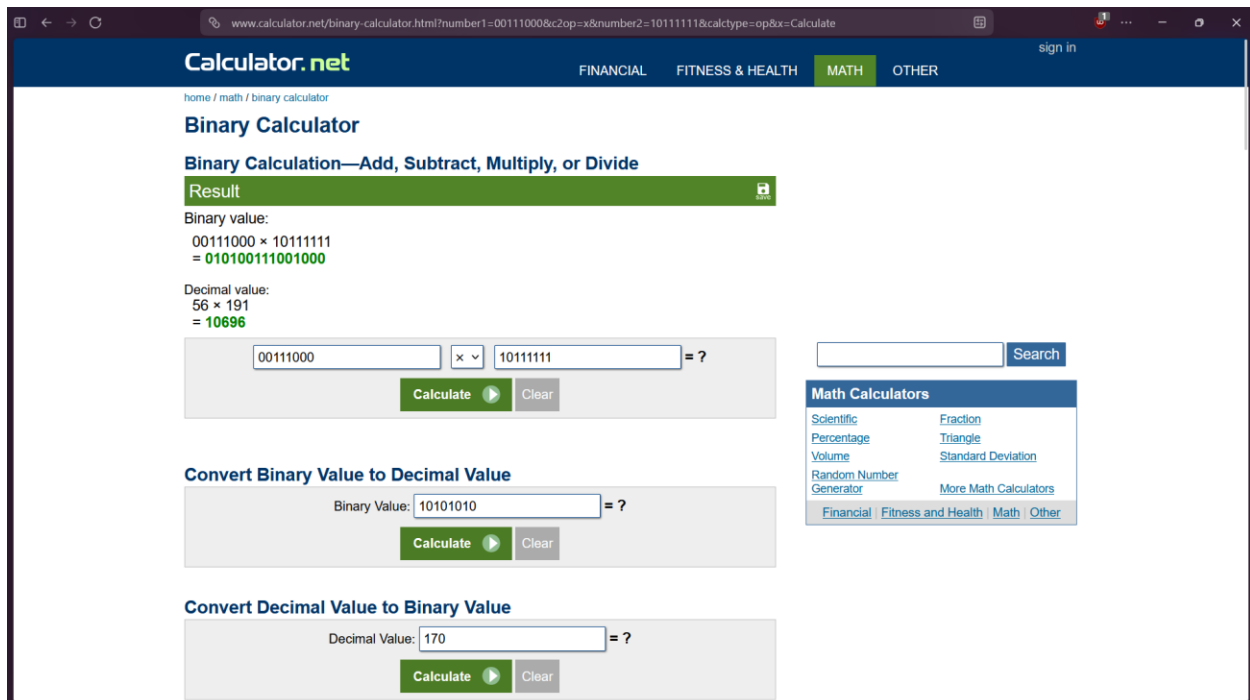

Untuk challenge ini saya di berikan instance

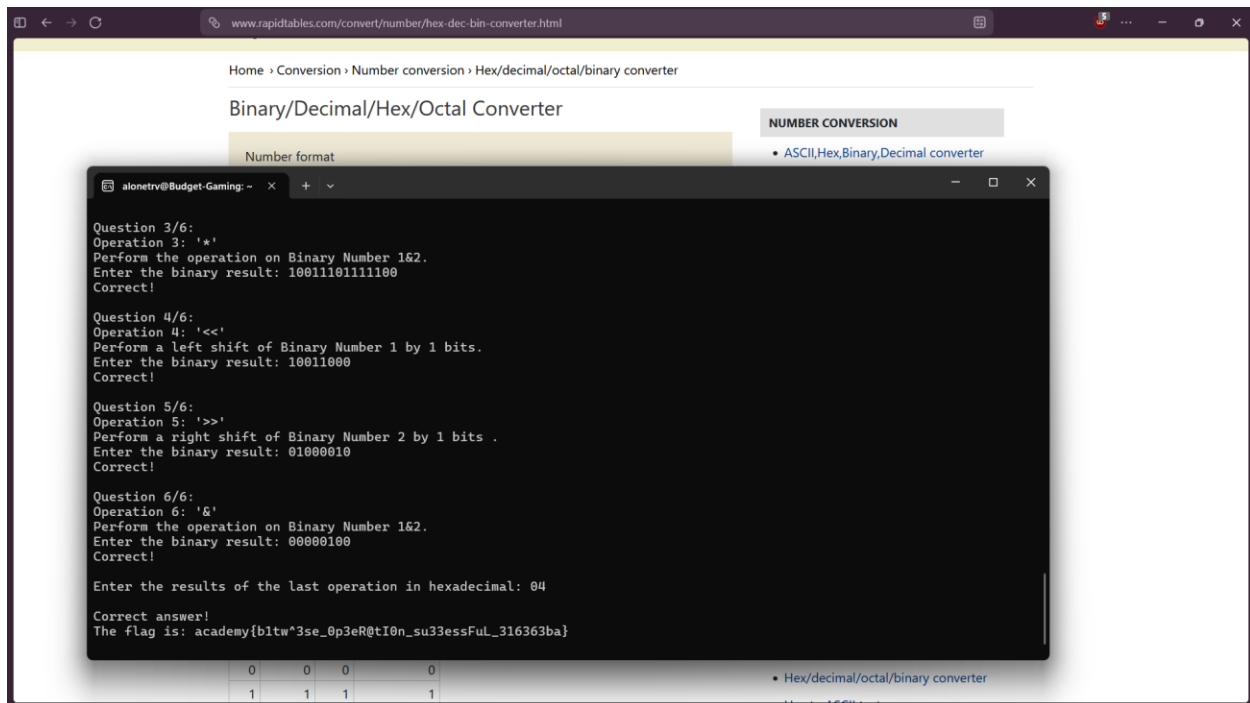

Dan disuruh untuk melakukan operasi biner pada biner yang di berikan

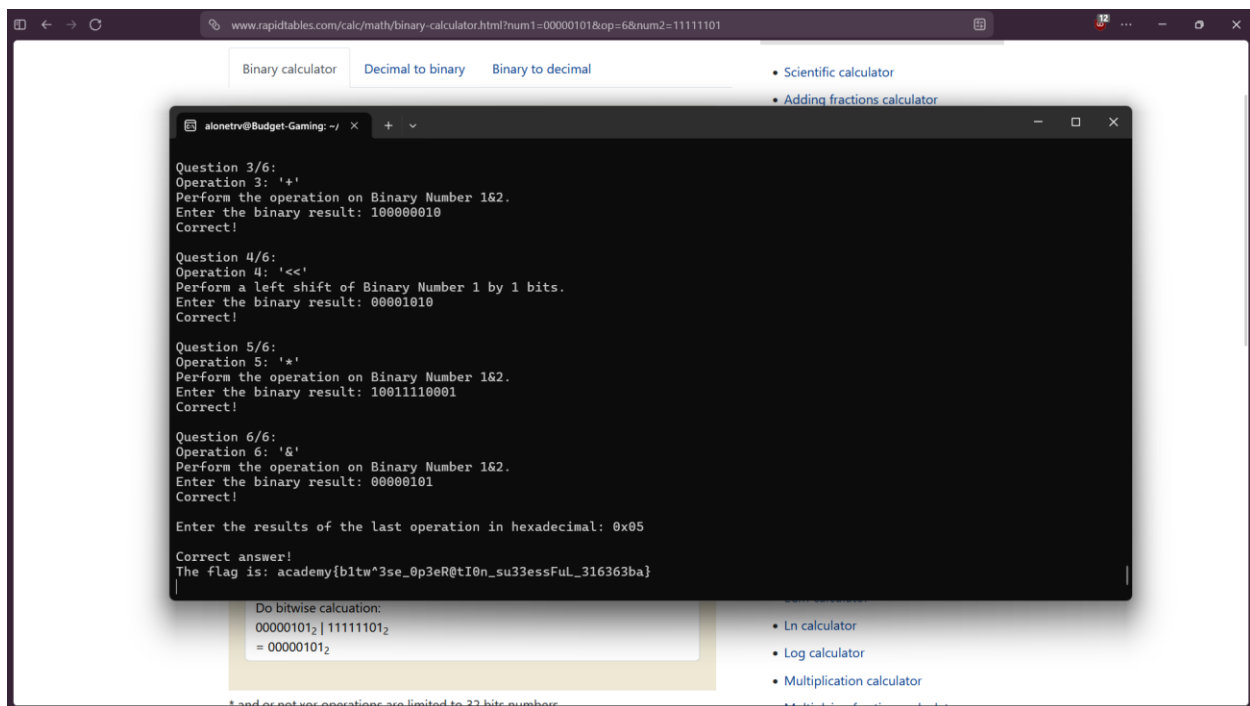

Dan gagal, dan saya mencoba mencari di internet bagaimana cara menghitung biner tersebut dan ketemu kalkulator biner

Dan berhasil, kemudian setelah pertanyaan biner terakhir diminta untuk memasukan hasil terakhir dalam bentuk hexadecimal, saya memakai converter untuk mencari nya dan flag di dapatkan

Dan challenge #4 Selesai

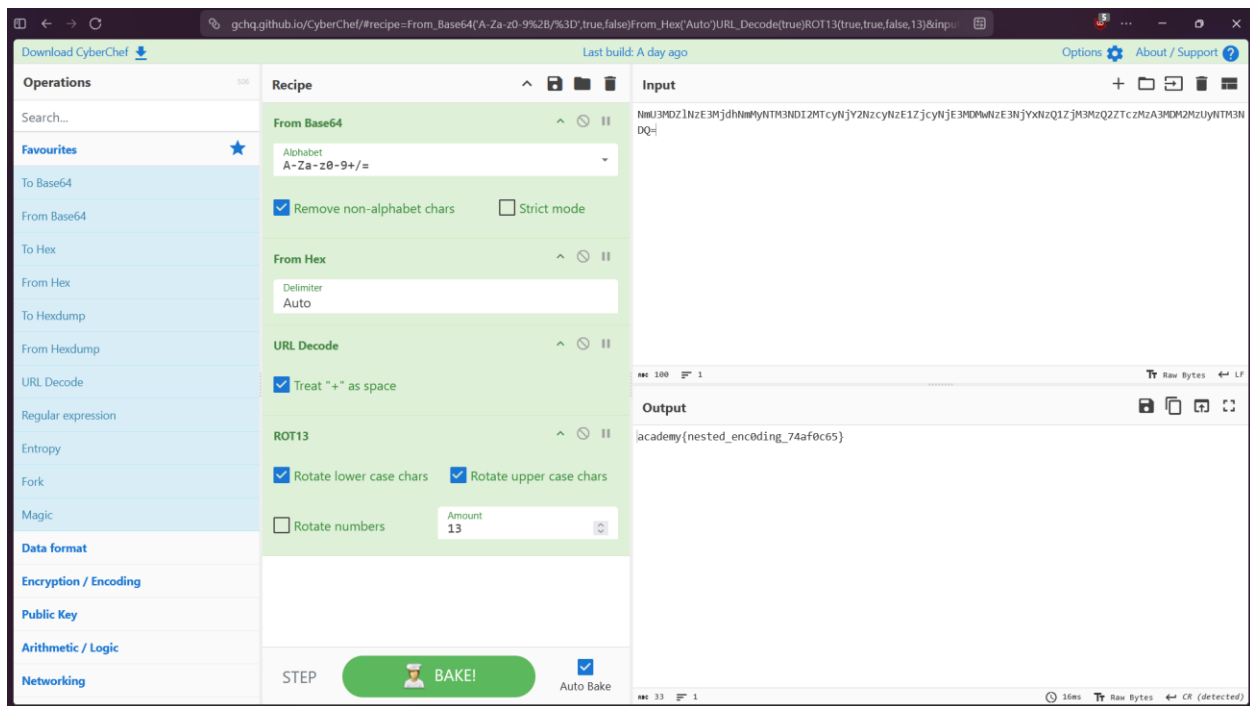

Challenge #5

Nama Challenge: Multicode

Kategori: General Skills

Deskripsi: We intercepted a suspiciously encoded message, but it's clearly hiding a flag. No encryption, just multiple layers of obfuscation. Can you peel back the layers and reveal the truth? Download the [message](#)

Disuruh untuk mendecode pesan yang kemungkinan itu flag, untuk saat ini saya lumayan bingung dan mencoba untuk membuka salah satu hint nya, dan kata hint nya pesan tersebut kemungkinan pakai encoding umum seperti ROT13, URL encoding, Hex, atau base64, dan saya coba cari bagi mana untuk decode pesan tersebut dan teringat CyberChef™®©

Dan berhasil menemukan kodenya Challenge #5 Selesai

Challenge #6

Nama Challenge: Nice Netcat

Kategori: General Skills

Deskripsi: There is a nice program that you can talk to by using this command in a shell:

Untuk challenge ini saya diberikan instance dan saat saya menjalankan program diberikan banyak nomor

```
alonetrv@Budget-Gaming: ~/  + v
Hello user! Pass me a -h to learn what I can do!
alonetrv@Budget-Gaming:~/supernigger$ -h
-h: command not found
alonetrv@Budget-Gaming:~/supernigger$ ./warm -h
Oh, help? I actually don't do much, but I do have this flag here: academy{blscults_4nd_gr4vy_57d8c79}
alonetrv@Budget-Gaming:~/supernigger$ nc chatelaine.cylabacademy.net 43654

Saya lumayan bingung untuk melakukan apa selanjutnya saya pun membuka hintnya, saya melihat di salah satu hint nya ada mengatakan ascii, saya pun mencoba mencari ascii translator

and ketemu decimal to ascii

The screenshot shows a web browser window with the URL `www.rapidtables.com/convert/number/ascii-hex-bin-dec-converter.html`. The page title is "ASCII, Hex, Binary, Decimal, Base64 converter". Below the title, there is a section "Enter ASCII text or hex/binary/decimal numbers:" with an "Open File" button and a "Reset" button. The "Number delimiter" is set to "Space". The "ASCII text" input field contains the string `academy{g00d_k1tty!_n1c3_k1tty!_7ef52}`. The "Hex (bytes)" output field shows the hexadecimal representation: `61 63 61 64 65 60 79 78 67 30 64 5f 68 31 74 74 79 21 5f 6e 31 63 33 5f 68 31 74 79 21 5f 37 65 66 35 32 7d 0a`. The "Binary (bytes)" output field shows the binary representation: `01100001 01100011 01100001 01100100 01100101 01101101 01111001 01111011 01100111 00110000 00110000 01100100 01011111 01101011`. The "Decimal (bytes)" output field shows the decimal representation: `98 125 18`. The "Base64" output field shows the Base64 representation: `YmVhZGVteXtnMDBkX2sxdHR5IV9uMmZlX2sxdHR5IV83ZWY1Mn0K`. On the right side of the page, there is a "NUMBER CONVERSION" sidebar with a list of conversion options: ASCII, Hex, Binary, Decimal converter; ASCII to binary; ASCII to hex; Base converter; Binary converter; Binary to ASCII; Binary to decimal; Binary to hex; Date to roman; Decimal to fraction; Decimal to percent; Decimal to binary; Decimal to octal; Decimal to hex; Fraction to decimal; Fraction to percent; Hex/decimal/octal/binary converter; Hex to ASCII; Hex to binary; Hex to decimal; and Octal to decimal.

Dan challenge #6 Selesai

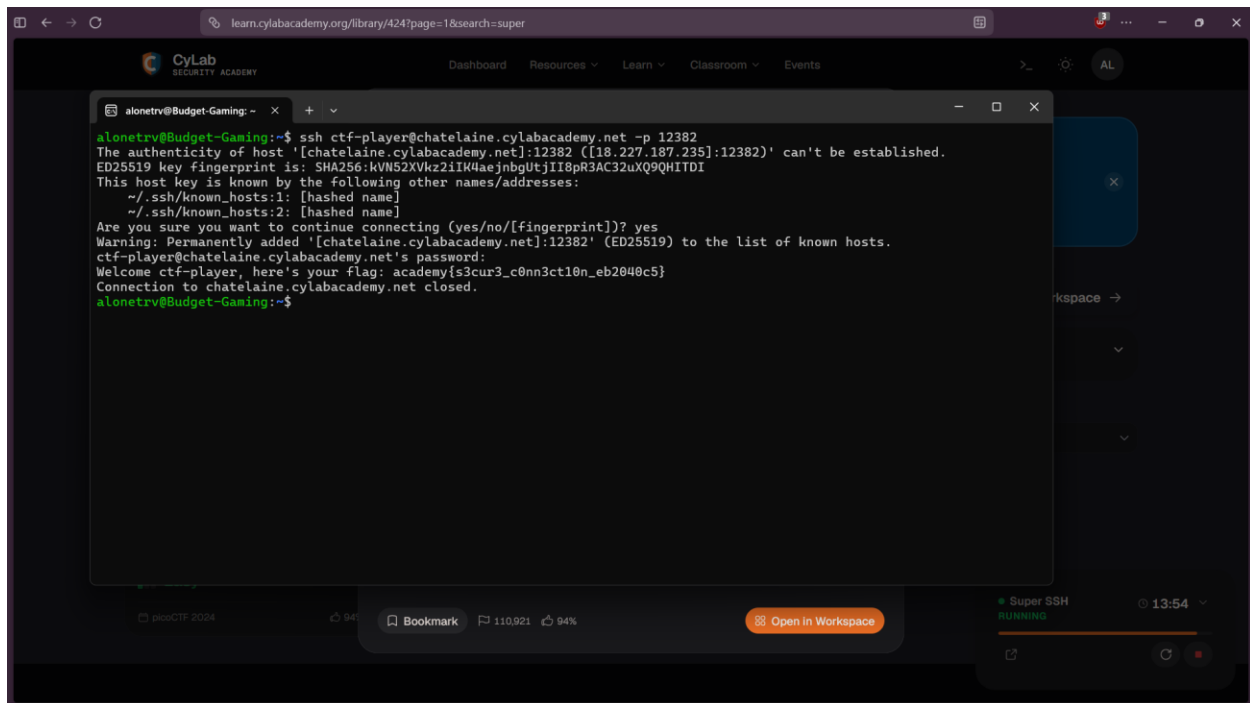

Challenge #7

Nama Challenge: SuperSSH

Kategori: General Skills

Deskripsi: Using a Secure Shell (SSH) is going to be pretty important.

Untuk challenge ini saya di suruh untuk melakukan login sebagai ctf-player ke `xebec.cylabacademy.net` dengan port 33394 karena saya bingung saya coba baca baca hint nya, dan diberikan website oleh hintnya tentang ssh, dan saya baca baca hint yang lain, dan untuk port saya coba mencari bagaimana cara memasukan port dalam wsl dan saya mecoba menggabungkan command nya "ssh [ctf-player@chatelaine.cylabacademy.net](https://xebec.cylabacademy.net) -12382" dan berhasil

Kemudian di minta untuk fingerprint dan dalam deskripsi challenge nya disuruh ketik yes dan berhasil kemudian memasukkan password yang diberikan deskripsi challenge nya dan

Challenge #7 Selesai

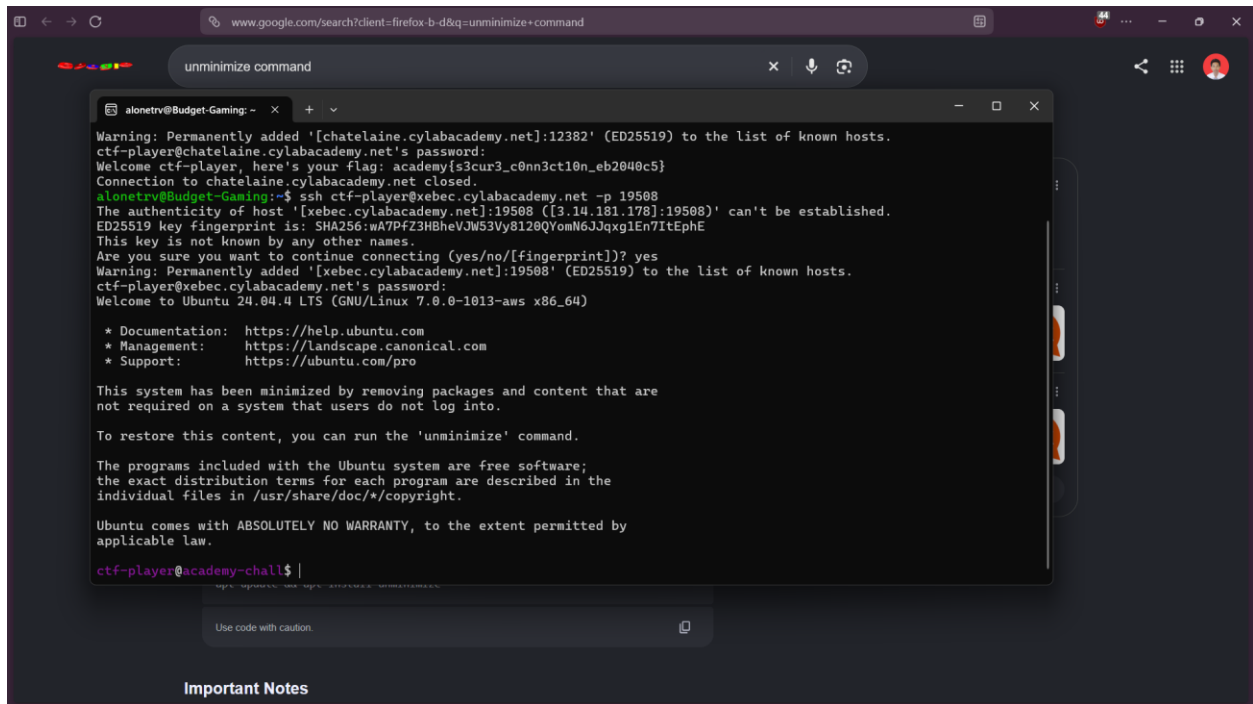

Challenge #8

Nama Challenge: Piece by Piece

Kategori: General Skills

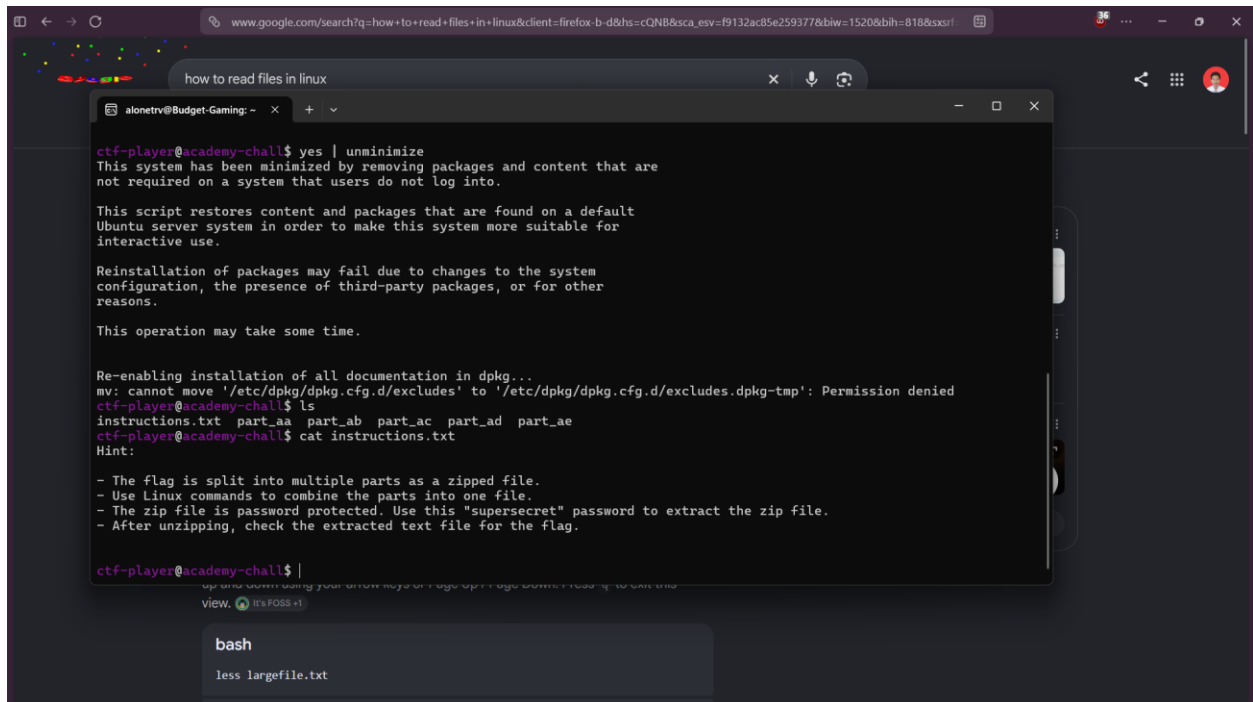

Deskripsi: After logging in, you will find multiple file parts in your home directory. These parts need to be combined and extracted to reveal the flag.

Dalam challenge ini di suruh lagi login ssh, saya coba lagi command yang sebelumnya saya pakai dan berhasil

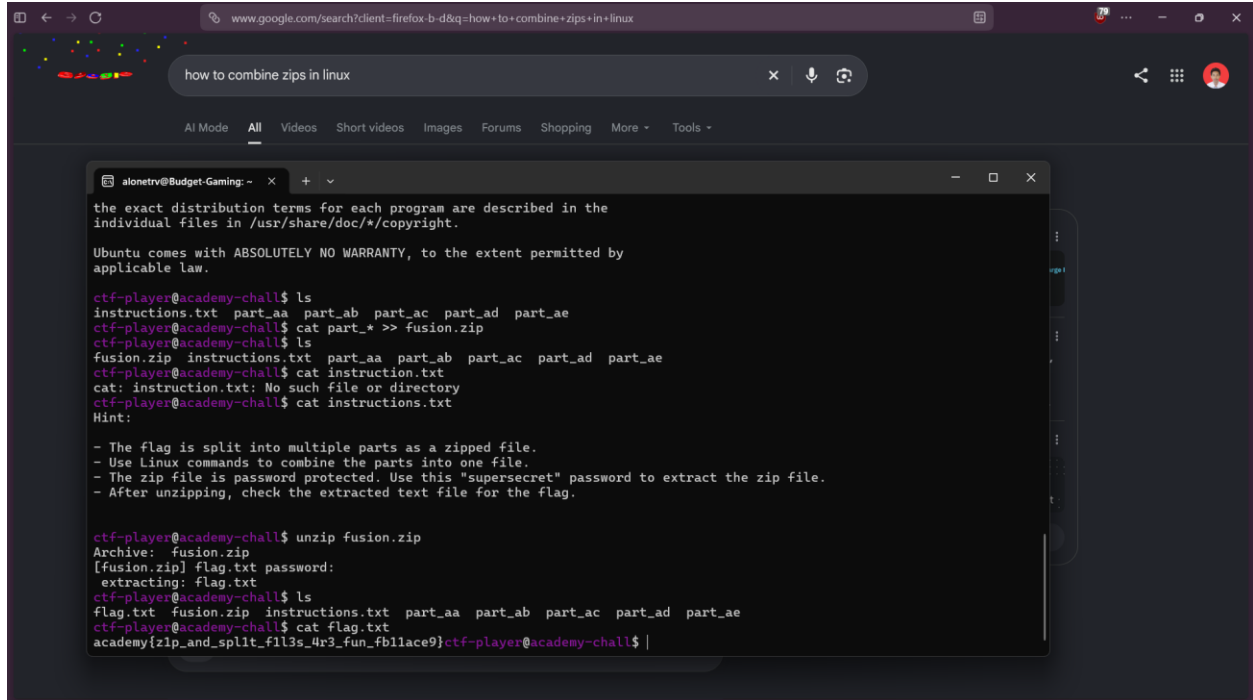

```
alonertrv@Budget-Gaming: ~  
Warning: Permanently added '[chatelaine.cylabacademy.net]:12382' (ED25519) to the list of known hosts.  
ctf-player@chatelaine.cylabacademy.net's password:

Warning: Permanently added '[xebec.cylabacademy.net]:19508' (ED25519) to the list of known hosts.  
ctf-player@xebec.cylabacademy.net's password:  
Welcome to Ubuntu 24.04.4 LTS (GNU/Linux 7.0.0-1013-aws x86_64)  
  
* Documentation:  https://help.ubuntu.com  
* Management:    https://landscape.canonical.com  
* Support:        https://ubuntu.com/pro  
  
This system has been minimized by removing packages and content that are  
not required on a system that users do not log into.  
  
To restore this content, you can run the 'unminimize' command.  
  
The programs included with the Ubuntu system are free software;  
the exact distribution terms for each program are described in the  
individual files in /usr/share/doc/*/copyright.  
  
Ubuntu comes with ABSOLUTELY NO WARRANTY, to the extent permitted by  
applicable law.  
  
ctf-player@academy-chall$ |
```

Saya pun melihat bahwa saya seperti dalam directory lain, saya pun coba untuk liat isi directory nya apa dan ada file instruksi yang saat saya baca dibilang bahwa flagnya terpisah dalam zip yang berbeda dan mengharuskan saya untuk menggabungkan zip tersebut dan membaca isi nya

```
ctf-player@academy-chall$ yes | unminimize  
This system has been minimized by removing packages and content that are  
not required on a system that users do not log into.  
  
This script restores content and packages that are found on a default  
Ubuntu server system in order to make this system more suitable for  
interactive use.  
  
Reinstallation of packages may fail due to changes to the system  
configuration, the presence of third-party packages, or for other  
reasons.  
  
This operation may take some time.  
  
Re-enabling installation of all documentation in dpkg...  
mv: cannot move '/etc/dpkg/dpkg.cfg.d/excludes' to '/etc/dpkg/dpkg.cfg.d/excludes.dpkg-tmp': Permission denied  
ctf-player@academy-chall$ ls  
instructions.txt part_aa part_ab part_ac part_ad part_ae  
ctf-player@academy-chall$ cat instructions.txt  
Hint:  
  
- The flag is split into multiple parts as a zipped file.  
- Use Linux commands to combine the parts into one file.  
- The zip file is password protected. Use this "supersecret" password to extract the zip file.  
- After unzipping, check the extracted text file for the flag.  
  
ctf-player@academy-chall$ |
```

Dan saya menemukan ternyata bisa memakai command “cat [namafile]_* >> [namafile gabungan].zip, saya kemudian menggabungkan file zip nya dan melakukan unzip kemudian di tanyakan password, tapi password sudah dikasih sama file instructionsnya dan unzip nya berhasil, kemudian saya membuka flag.txt dan berhasil mendapatkan flagnya

The screenshot shows a web browser window with a Google search for "how to combine zips in linux". Below the browser, a terminal window titled "alonertrv@Budget-Gaming: ~" displays the following commands and output:

```
the exact distribution terms for each program are described in the
individual files in /usr/share/doc/*/copyright.
